Re: Report of Electric Generation Supplier by Energy Source and  
Statement of Gross Receipts, 2002: Dominion Retail, Inc., EGS  
License No. A-110008

Dear Mr. McNulty:

Enclosed for filing is the report of Dominion Retail, Inc. in compliance with the Commission's directive that electric generation suppliers report the fuel sources used in the generation of electricity for customer consumption.

If you have any questions, please contact me.

Sincerely,

Gary A. Jeffries  
Senior Counsel

**AFFIDAVIT**

THIS AFFIDAVIT is executed this 10<sup>th</sup> day of April 2003, by JEFFREY L. JONES, Director, Retail Electric Commodity Operations, Dominion Retail, Inc., 120 Tredegar Street, Richmond, VA 23219.

1. Dominion Retail, Inc. ("Dominion") is licensed as an "electric generation supplier" by the Pennsylvania Public Utility Commission at License No. A-110008.
2. Dominion does not own or operate any electric generation facilities nor is Dominion a party to any power purchase contract under which Dominion purchases a specific block of power generated by a particular fuel source for resale to Pennsylvania retail customers. However, because of the laws regarding electricity flow, Dominion is not able to state with certainty that such energy is actually delivered to Pennsylvania customers.
3. Therefore, for purposes of reporting to the Pennsylvania Public Utility Commission, Dominion is unable to distinguish and identify by fuel source the origin of the power it acquires for resale to retail customers in Pennsylvania.

FURTHER AFFIANT SAYETH NOT.

**NOTE to the Consumer:** Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. This report reflects the estimated percent of total sales based on the primary fuel source used in the generation of electricity for customer end-use in the Commonwealth of Pennsylvania. Some generators may use a combination of fuel sources, such as oil and coal or oil and natural gas, which may be combined or used alternatively. In this instance, only the primary fuel source is reported. Data may also include negative sales for pumped storage hydroelectric operations, which could require the use of any fuel source except hydropower. If any supply source includes Distributed Generation or Combined Heat and Power, the applicable categories will be marked "DG" and/or "CHP." If net metering is deployed, an asterisk (\*) appears within the applicable categories. Upon request by the consumer, electricity providers are required to provide information on generation energy sources, energy efficiency, environmental impacts or personal historical billing data.

**NOTE to the Entity filing this report:** Please review above "Note to the Consumer" for important information needed to adequately complete this form. Verification of the anticipated generation energy source, of the identifiable resources (if and when they have been "claimed") and the fact that energy characteristics were not sold more than once, shall be conducted by an independent auditor at the end of each calendar year and contained in this annual report to the Commission. If generation energy sources are not identifiable, the provider shall disclose this fact.
