

Dear Sir/Madam,

It will be great if you can change a law to switch to other electric supplier faster (in 5 or less days). But also I think it is necessary to have a law in which will be posted that no one can make rate higher several times than the rate which is right now on a market, or company should provide future rate changing information to the customers in advance, so that customers can choose a rate which they like.

Thank you very much.

Sincerely yours,

Anna Perederina
