This letter is to reference Docket # M-2017-2631527

Would you please allow Act 40 which "closed the border" of the solar renewable energy credit (SREC) market to allow only PA located systems to qualify and sell SRECs into the PA market to stand as written.

If you grandfather in all existing out of state solar systems and allow them to sell to PA utilities this will make Act 40 ineffective and the PA prices to continue to drop.

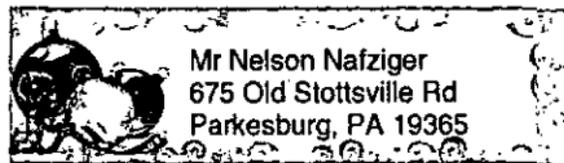

Please vote to keep Act 40 as it was written and not allow grandfathering.

Thank you for your vote in favor of Act 40.
