Re: Implementation of Act 40 of 2017, Tentative Implementation Order

Docket Number: **M-2017-2631527**

Dear Pennsylvania Public Utility Commissioners:

We urge you to implement Act 40 as lawmakers intended, and to only allow solar systems within Pennsylvania to qualify for and sell SRECs into the Pennsylvania market under the Commonwealth's Alternative Energy Portfolio Standards.

This bipartisan effort was designed to encourage more investment and job creation in Pennsylvania's solar industry, and to make the Commonwealth more attractive to businesses (like Amazon) looking to power their operations with renewable energy and grow their businesses in a clean energy economy.

Unfortunately, the PUC's current interpretation of the law directly contradicts the legislative intent, and allows jobs and investment dollars for solar energy projects to continue flowing out of Pennsylvania.

Pennsylvanians are counting on this law being implemented as intended, in order to help ensure that the benefits of increased renewable jobs, a cleaner environment, and a growing clean energy economy will be felt right here at home.

We implore you to revise your interpretation so it truly closes the loophole and does not grandfather existing out-of-state solar projects.

Sincerely,

The Undersigned
