PPL / Comcast Collusion

I would like to know why the much anticipated fiber optic service that Lancaster Connect was to offer for all Lancaster City has been effectively killed by PPL refusing MAW access to their utility poles. I find it curious that PPL seems to have no problem sharing their poles with Comcast. I smell a rat here. There's nothing a monopoly abhors more than competition. This should not be allowed to happen in a free market democracy... we deserve to have a choice!
