Comments on Docket No. L-2019-3010267

To the PUC:

Thank you for the opportunity to comment on the above.

For the sake of our children and generations beyond, I believe Pennsylvania can and should be a leader in the move away from reliance on fossil fuels. There are some encouraging signs already, such as the increased use of solar power. Permitting new pipeline construction, especially given the safety risks involved, for me takes us in the opposite and wrong direction. I urge the PUC to implement a ban on new pipeline construction and more stringent safety requirements for existing pipelines. Thank you.

Sincerely,

Len Rieser
