Re: Docket L-2019-3010267

In reference to the Advance Notice of Proposed Rulemaking Regarding Hazardous Liquid Public Utility Safety Standards, I wish to make the following comments. It is completely inappropriate to have pipelines carrying volatile natural gas liquids through densely populated communities in Pennsylvania. Due to the nature of the product being transported in the pipeline and the geography of the communities in Chester County, there is no way to craft an adequate evacuation plan to advise residents in the event of a catastrophic release of product. The risks to the community are far too great. Please take immediate measures to halt the construction of the Mariner 2 and 2x pipelines, and do not approve any further pipelines transporting similar materials.

Thank you,

Brian Sweet
